CONTENT

1. The Basics

- 1.1. Expansion And Retracement
- 1.2. Fibonacci Retracement
- 1.3. Break In Market Structure
- 1.4. Range High and Range Low
- 1.5. Failure Swing (SMS)

2. Market Structure

- 2.1. Market Structure In Bullish Conditions

3. Liquidity

- 3.1. Liquidity Types
- 3.2. Buy Stops Liquidity (BSL)
- 3.3. What to Focus on (For BSL)
- 3.4. Sell Stops Liquidity (SSL)
- 3.5. What to Focus on (For SSL)
- 3.6. Stop Hunt: Manipulation For Liquidity
- 3.7. High Impact News Events

4. Order Blocks

- 4.1. Bullish Order Block
- 4.2. Bearish Order Block

5. Daily Range Price Action

- 5.1. Sessions
- 5.2. Asian Session
- 5.3. London Session
- 5.4. New York Session
- 5.5. Accumulation, Manipulation And Distribution

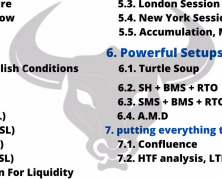

6. Powerful Setups

- 6.1. Turtle Soup
- 6.2. SH + BMS + RTO
- 6.3. SMS + BMS + RTO
- 6.4. A.M.D

7. putting everything together

- 7.1. Confluence
- 7.2. HTF analysis, LTF Entries

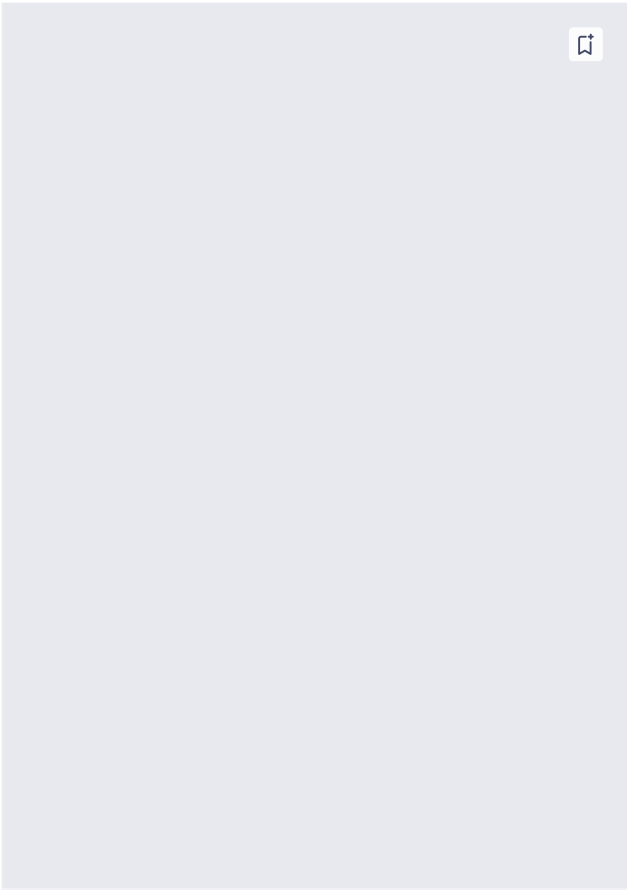

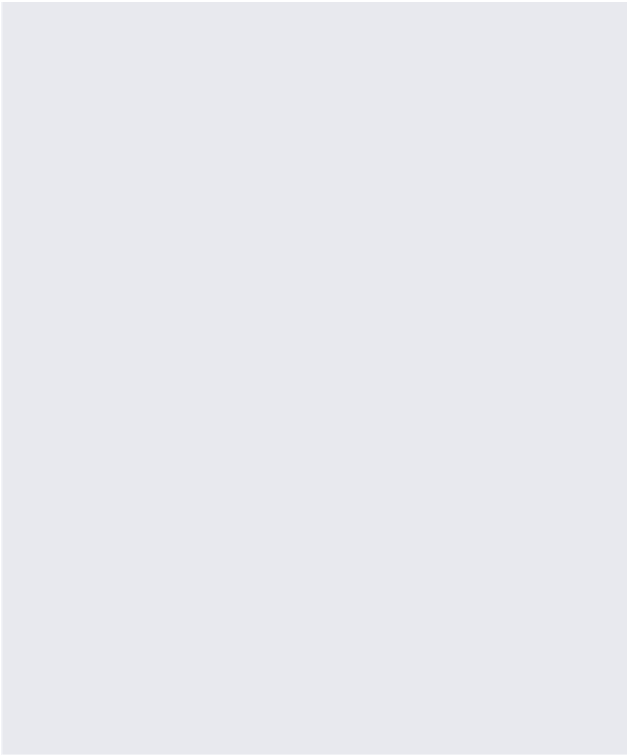

8. Marked Up Charts

Stop Hunt: Manipulation For Liquidity 3.7. High Impact News Events 4. Order Blocks 8. Marked Up Charts 4.1. Bullish Order Block 4.2. Bearish Order Block
3. **CHAPTER 1: THE BASICS**
4. **THE BASICS 1. 1.1. EXPANSION AND RETRACEMENT** Expansion => occurs when there is an impulse movement towards a direction. Retracement => is the correction movement after an impulse movement.
5. **E E E R R E E R R UPTREND DOWNTREND E** - Expansion R- Retracement
6. **EXPANSION AND RETRACEMENT**
7. **1.2. FIBONACCI RETRACEMENT USED** TO DETERMINE THE END OF THE RETRACTION MOVEMENT, USUALLY THE PRICE RETRACTS TO 50% OR UNTIL OTE (0.62, 0.705, 0.79) BEFORE ANOTHER IMPULSE MOVEMENT OCCURS.
8. **FIBONACCI RETRACEMENT E - Expansion R** - Retracement
9. **1.3. BMS - BREAK IN MARKET STRUCTURE** BMS occurs when the price closes above / below a swing high/low, generally, every trader should trade in the direction of the Higher Time Frame BMS. NOTES: AFTER BMS ALWAYS WAIT FOR RETRACEMENT.
10. **OTE OTE A to B-** Downtrend B to C- Uptrend BMS - Break In Market Structure OTE OTE OTE
11. **1.4. Range High** and Range Low After the BMS there will always be the formation of a new consolidation, that is called RH and RL. NOTES: => Trade in the direction of the BMS => After BMS Wait for retracement to 50% OR OTE of Fibonacci levels.
12. **BMS RL RH OTE [Low Risk Buy]** BMS RH RL BULLISH BEARISH OTE [Low Risk Sell]
13. **Range High and Range Low** RH- Range High RL- Range Low
14. **1.5. FAILURE SWING (SMS)** When there is an uptrend market and the price fails to break the last top (Swing High) and breaks the previous bottom (Swing Low), an SMS is considered to have occurred (vice versa for Bearish).

15. **SMS BMS BULLISH BEARISH BMS BMS FAILURE SWING** (SMS)
16. **Bullish Bearish BMS BMS BMS FAILURE SWING** (SMS)
17. **Chapter 2: MARKET STRUCTURE**
18. **2. MARKET STRUCTURE** The price can simply be found in one of the 3 phases below: 1. In a CONSOLIDATION 2. In an UPTREND 3. In a DOWNTREND
19. **2.1. Market Structure** In Bullish Conditions The bullish market is characterized by making Higher Highs and Higher Lows, but this characterization is not enough, it is necessary to say that bullish markets are always breaking swing Highs and respecting swing lows. [VICE VERSA FOR BEARISH CONDITION]
20. **The fact that** the price has broken a swing high, indicates that higher prices should be expected, so it is negotiated in the trend in which the market structure was broken.
21. **BMS BMS BMS NOTES: => The Price** is breaking the highs only => After BMS the price Retract to 50%/OTE of Fibbo Levels. OTE OTE[LRB] 2.1. Market Structure In Bullish Conditions [VICE VERSA FOR BEARISH CONDITIONS] LRB- Low Risk Buy
22. **2.1. Market Structure** In Bullish Conditions [VICE VERSA FOR BEARISH CONDITIONS] [LRB] [LRB] LRB- Low Risk Buy
23. **BMS BMS BMS BMS OTE BMS OTE OTE OTE BMS "Trade In Direction** Of BMS" MARKET STRUCTURE
24. **Chapter 3: LIQUIDITY**
25. **3. LIQUIDITY** The FOREX market is a zero sum game, which means that for a trader/institution to buy/sell 1 currency pair it's necessary that there is another trader/institution with an opposite position. If Smart Money (Banks) want to buy a currency pair they will need sellers in the market, the existing facility to place these positions in the market is called LIQUIDITY.
26. **The Liquidity** is defined by Stop losses, where the Stop losses exist is where the liquidity also exists, Smart Money need to activate the stop losses of existing orders in the market so that they can place their positions in the market.
27. **The banks manipulate** the price because of liquidity, but why? banks negotiate large trading volumes and sometimes find it difficult to find the other side of their trades, so they manipulate the price so that they can have their positions in the market.
28. **3.1. LIQUIDITY TYPES** Buy Stops Liquidity (BSL) Sell Stops Liquidity (SSL) In the FOREX market there are two types of liquidity, which are: 1. 2.
29. **3.2. Buy Stops** Liquidity (BSL) The BSL is originated by Stop Losses of sell orders, after the BSL is taken, the market reverses to the downside, because banks use the BSL to place sell orders in the market.
30. **3.3. What to focus on** (for BSL) PMH - Previous Month High PWH - Previous Week High PDH - Previous Day High HOD - High Of Day OLD HIGH - Swing High EQUAL HIGHS = Retail Resistance
31. **X- PMH, PWH, PDH, HOD, OLD HIGH. X BSL TAKEN X EQUAL HIGHS BSL TAKEN**
32. **PMH - PREVIOUS MONTH HIGH**
33. **PWH - PREVIOUS WEEK HIGH**
34. **PDH - PREVIOUS DAY HIGH**
35. **HOD - HIGH OF DAY**
36. **EQUAL HIGHS =** Retail Resistance
37. **3.4. Sell Stops** Liquidity (SSL) The SSL is originated by Stop Losses of Buy orders, after the SSL is taken, the market reverses to the Upside, because banks use the SSL to place Buy orders in the market.
38. **3.5. What to focus on** (for SSL) PML - Previous Month Low PWL - Previous Week Low PDL - Previous Day Low LOD - Low Of Day OLD LOW - Swing Low EQUAL LOWS = Retail Support
39. **X- PML, PWL, PDL, LOD, OLD LOW. X X SSL TAKEN EQUAL LOWS SSL TAKEN**
40. **PML - PREVIOUS MONTH LOW**
41. **PDL - PREVIOUS DAY LOW**
42. **LOD - LOW OF DAY**
43. **OLD LOW - SWING LOW**
44. **EQUAL LOWS =** Retail Support
45. **When BSL** is taken, the market reverses to the downside. When SSL is taken, the market reverses to the upside.
46. **SH is a** movement used to neutralize liquidity (stop losses). It's a false breakout above / below the zone where there is LIQUIDITY. THE MARKET MARKERS (BANKS) USUALLY USE HIGH IMPACT NEWS TO TAKE LIQUIDITY. 3.6. Stop Hunt: Manipulation For Liquidity
47. **Stop Hunt: Manipulation** For Liquidity SH- Stop Hunt
48. **Stop Hunt: Manipulation** For Liquidity SH- Stop Hunt
49. **High Impact News** Events The High Impact News Events are used to hunt liquidity in the market, always pay attention to the news calendar, to know the pairs that will move, generally, pairs with many news forecasts ("High Impact"), those pairs are going to move (trending) during the day or week.
50. **Chapter 4: ORDER BLOCKS**
51. **4. ORDER BLOCKS** [OB] Bullish Order Blocks Bearish Order Blocks Order Blocks are candles where Market Makers (Banks) have placed their positions, generally, the market returns to those candles and they are never violated ("if they are really OB's") There're 2 types of Order Blocks: 1. 2.
52. **4.1. BULLISH ORDER BLOCK** The Bullish Order Block is the last bearish candle before the bullish movement, that Break The Market Structure Higher. Represents a high possibility of holding the price, when the price returns to it.
53. **The Bearish Candle Before** The Bullish Movement, that BMS Higher Buy Entry BULLISH ORDER BLOCK BMS SL below the OB
54. **BULLISH ORDER BLOCK**
55. **4.2. BEARISH ORDER BLOCK** The Bearish Order Block is the last bullish candle before the bearish movement, that Break The Market Structure Lower. Represents a high possibility of holding the price, when the price returns to it.
56. **The Bullish Candle Before** The Bearish Movement, that BMS Lower Sell Entry BEARISH ORDER BLOCK BMS SL above the OB
57. **BEARISH ORDER BLOCK**
58. = O L H C **Chapter 5: DAILY RANGE PRICE ACTION**
59. **The Daily Range** is defined by: Open Price, Low Of Day, High Of Day and Close Price. 5. DAILY RANGE PRICE ACTION = O L H C O- Open Price L- Low Of Day H- High Of Day C- Close Price
60. **L H C O L H C O Bullish Day Bearish Day**
61. **5.1. SESSIONS Asian Session London** Session New York Session The Daily Range is defined by 3 important sessions, which are: 1. 2. 3.
62. **5.2. Asian Session** The Asian session is characterized by being a consolidation (of 20 - 40 pips), due to the lack of liquidity in the market. Delimitation: The session starts from 02:00 until 08:00 (UTC +2).
63. **ASIAN SESSION**
64. **ASIAN SESSION**
65. **5.2. London Session** The London Session is characterized by making the Low Of Day or High Of Day, it can be used to take traders to the opposite side of the true direction of the day (Because Of Liquidity). Delimitation: Not the whole London session need attention, focus on the first 2-3 Hours at the beginning of the session: From 09:00 until 11:00/12:00 UTC(+2).
66. **London Open**
67. **London Open**
68. **The NY session** is characterized by being a retraction after the London Session made the Low/High of the day, sometimes the NY session can make the Low/High of the day. Not the whole NY session need attention, focus on the first 2-3 Hours at the beginning of the session: From 14:00 until 16:00/17:00 UTC(+2) 5.3. New York Session Delimitation:
69. **New York Open**
70. **New York Open**
71. **New York Open**
72. **5.4. Accumulation, Manipulation And** Distribution [AMD] Accumulation: The accumulation of positions generally occurs during the Asian session, the accumulation is characterized by being a consolidation (Asian session), but it may not be the Asian session.
73. **usually occurs at** the opening of the London session (sometimes it can be NY open), this Manipulation consists of taking the price to the opposite side of the true direction of the rest of the day. Distribution: occurs when MMs liquidate (Exit) their positions. Manipulation
74. **AMD on the daily Bar** A { } M D { A { M } D { }
75. **Accumulation [Asia Session] London** Open / New York Open 1. 2. 1 LO/NYO M D A M D DAILY BAR Bullish AMD VICE-VERSA FOR BEARISH
76. **Bullish AMD**
77. **Bearish AMD**
78. **The Market Makers** (Banks) Buy/Sell below/Above the Asian Session/open price (Because Of Liquidity). Asian Session/Open Price: Below: Sell Stops Liquidity [SSL].

Above: Buy Stops Liquidity [BSL].

79. **Chapter 6: POWERFUL** SETUPS

80. **TURTLE SOUP Turtle Soup** is the same as Stop Hunt, is a movement used to neutralize liquidity (stop losses). It's a false breakout above / below the zone where there is liquidity.

81. **Turtle Soup Short** [TSS] Represent a short setup, it's a false break above a zone where Buy Stops Liquidity Exist. Turtle Soup Long [TSL] Represent a long setup, it's a false break Below a zone where Sell Stops Liquidity Exist.

82. **How To Trade** Turtle Soup The price usually Sweeps 5-20 pips (even more) above or below a point where liquidity Exist, after the price sweep the point, enter a trade against the movement used to Sweep Stops (Liquidity) with Minimum 10 pips SL (In Lower Time Frames). That means: BSL Raid => Turtle Soup Short SSL Raid => Turtle Soup Long

83. **X BSL 5-20 pips** Sweep Turtle Soup Short SL SELL 10 pips SL (min) X- PDH, HOD, OLD HIGH, EQUAL HIGHS TURTLE SOUP SHORT

84. **TURTLE SOUP SHORT**

85. **X SSL 5-20 pips** Sweep Turtle Soup Long BUY SL 10 pips SL (min) X- PDL, LOD, OLD LOW, EQUAL LOWS TURTLE SOUP LONG

86. **TURTLE SOUP LONG**

87. **Stop Hunt, Break** In Market Structure and Return To Order Block [SH, BMS, RTO] Where Market Makers (Banks) have taken liquidity (SH), they have placed positions in these areas and generally the price must not exceed these levels.

88. **First, occurs the** SH, that movement is used by Market Makers to neutralize Liquidity. Second, there's a Break In Market Structure (BMS), Confirming the SH. Third, the price Return To Order Block (RTO). 1. 2. 3. How To Trade SH + BMS + RTO

89. **BMS SH X RTO BUY SL Bullish SH** + BMS + RTO 1st Target

90. **Bullish SH** + BMS + RTO x BSL x BSL [1st TARGET]

91. **X SH RTO BMS Sell SL 1st** Target Bearish SH + BMS + RTO

92. **Bearish SH** + BMS + RTO 1st Target

93. **Failure Swing (SMS)**, Break In Market Structure and Return To Order Block [SMS + BMS + RTO] When the price fails to break a top or bottom, it shows that the trend is ending and a reversal may occur

94. **How To Trade** SMS + BMS + RTO First, the price fails to break a top or bottoms. Second, there's a Break In Market Structure (BMS), Confirming the SMS. Third, the price Return To Order Block (RTO). 1. 2. 3.

95. **Bullish SMS** + BMS + RTO BMS SMS RTO BUY SL

96. **Bullish SMS** + BMS + RTO

97. **Bearish SMS** + BMS + RTO SMS BMS RTO SELL SL

98. **Bearish SMS** + BMS + RTO

99. **Accumulation, Manipulation And** Distribution [AMD] How To Trade AMD: - Accumulation: the price will be ranging. - Manipulation: the price will break the range direction to trap traders (Because of Liquidity) - Distribution: the price will go against the Manipulation movement, and here, look to go long/short on: Simple RTOs, SH + BMS + RTO, SMS + BMS + RTO.

100. **Accumulation Accumulation Manipulation Distribution Go long on: Simple** RTO SH+BMS+RTO SMS+BMS+RTO Bullish AMD VICE-VERSA FOR BEARISH

101. **Bullish AMD VICE-VERSA FOR** BEARISH

102. **Chapter 7: PUTTING** EVERYTHING TOGETHER

103. **CONFLUENCE Confluence is very** important to increase the chances of winning trades, a trader needs to have at least two factors of confluence to open a trade. When the confluence exists, the trader becomes more confident on his negotiations.

104. **The Factors Of** Confluence Are: Higher Time Frame Analysis; Trade during London Open; Trade during New York Open; Refine Higher Time Frame key levels in Lower Time Frame entries; Combine setups; Trade during High Impact News Events.

105. **7.2. HTF analysis**, LTF Entries Refine HTF key levels in LTF entries or setups for confirmation that the HTF analysis will hold the price. HTF Key Levels Are: HTF Order Blocks; HTF Liquidity Pools; HTF Market Structure. Note: It's not mandatory to refine all HTF key levels.

106. **Time Frame Setups For** Swing Trading HTF: Weekly, Daily, H4. Entries: H1, M30, M15 (Sometimes on H4). For Short Term Trading HTF: Daily, H4, H1 Entries: M30, M15 (Sometimes on H1). For Day Trades and Scalps HTF: H4, H1, M30 Entries: M15, M5, M1 (Sometimes on M30).

107. **Swing Trading Example HTF** Setup: Turtle Soup Long. Weekly Time Frame

108. **Swing Trading Example LTF** Setup: SH + BMS + RTO. H1

109. **Swing Trading Example HTF** Setup: SH + BMS + RTO Daily Time Frame

110. **Swing Trading Example LTF** Setup: Turtle Soup And SH + BMS + RTO.

111. **Adicionar um título Short** Term Trading Example BMS LTF Sell Opportunity HTF Setup: Simple RTO after BMS.

112. **Short Term Trading Example LTF** Setup: SH + BMS + RTO. Another Confluence: RTO During New York Open.

113. **Short Term Trading Example HTF** Setup: Simple RTO, After SH.

114. **Short Term Trading Example LTF** Setup: SH + BMS + RTO inside of 4H RTO.
